

Press Release

Synergy Bags Huawei R&D Campus Project in Bangalore

Bangalore, India, December 14, 2010:

The Bangalore based project management company, **Synergy Property Development Services** today announced that they have been awarded the contract to manage the project of Huawei's new R&D facility to be constructed in Whitefield, Bangalore. The total cost of the project is estimated to be around Rs. 500 crores. The Huawei project comprises of a software development facility, a large cafeteria, multi-level car parking system and residential apartments. The project is expected to be completed within 24 months.

The Huawei campus development project will be on about 20 acres with a built-up area of about a million square feet. Huawei which is expanding aggressively in India will accommodate about 4,000 employees at the proposed campus.

Synergy, which has been appointed as the Project Management Consultancy by Huawei will work on design management and co-ordination, procurement management, construction management and will be responsible for time, cost, quality and environmental health and safety standards.

Mr. Sankey Prasad, Founder & Managing Director – Synergy said, "The scope of work for this prestigious project is huge and demanding and we are pleased to get an opportunity to prove our capabilities as project managers for the global leading telecom company. Huawei has gone through our track record of executing several huge projects within strict delivery schedules and entrusted us with this project."

"The team at Synergy continuously assists client and consultants to take advantage of the present market opportunities in lowering costs while maintaining development deliverables. Our team does in-depth analysis of each and every aspect to save cost without compromising on the quality of the development," he added.

About Synergy Property Development Services:

Synergy is a project management company, offers complete project management, delivery support and design services through all phases of the development process. It provides a single-point-contact and helps strategize to minimize risk and ensure safety. Established in January 2003, Synergy has been the launching platform for a group of engineering and architectural teams with diverse experience in India and abroad. Synergy has a strong team of over 600 people, with its resource pool including talented architects, engineers and project management personnel. The Company has a pan India presence with overseas offices in Malaysia and in the UAE. Till date, they have delivered over 100 million sft of development in India and Malaysia.
